

NEXT GENERATION QUAD-STRENGTH PREMIUM OMEGA FORMULA

Omega 4X SX-7[®] Black Onyx™ is an advanced, ultra-pure and high-potency fish oil formula designed specifically for hardcore athletes. With 1,500mg of fish oil in each serving, Omega 4X SX-7[®] Black Onyx™ supplies 1,200mg of omega-3 fatty acids – that's an 80% concentration, one of the highest potencies available. Each capsule delivers an incredible four times the omega-3 fatty acids of regular fish oil products. This includes high doses of the key omega-3 fatty acids docosahexaenoic acid (DHA) and eicosapentaenoic acid (EPA).

Featuring a Potent Dose of DPA

Omega 4X SX-7[®] Black Onyx™ also contains 150mg of docosapentaenoic acid (DPA) and other omega-3 fatty acids. DPA has recently been featured and recognized in numerous emerging research papers. And for a complete formula, 1,000 IU of vitamin D is included to help meet your daily requirements. Research suggests that healthy vitamin D levels are important in supporting athletic performance.▲

Highly Purified Fish Oil

The fish oil in Omega 4X SX-7[®] Black Onyx™ undergoes a five-step manufacturing process, which includes molecular distillation. Meanwhile, super-critical purification technology refines the precious oil to remove unwanted impurities, such as mercury, cadmium, lead and PCBs – harmful impurities you definitely don't want in your fish oil product.

OF SOFT GELS EQUIVALENT SERVINGS OF SALMON*

*1 serving (1 softgel) contains 1,200mg of omega-3 fatty acids, the same amount found in one 3-oz. serving of salmon.

No Fishy Aftertaste

A combination of the super-filtration process along with enteric-coated, easy-to-swallow softgels takes away those unwanted fish burps that are so common with lower quality fish oil products.
