

The Advantage Over Other Gainers

	Amplified Mass XXX™	Typical Mass Gainer
Clinically Proven Foundation of Carbs, Proteins and Fats	✓	No
Improves Mass with 40% Fewer Sets [◇]	✓	No
Tri-MG Infusion™ with Betaine and HMB	✓	No
Micronized Amino Acids with MicroSorb™ Amino Technology	✓	No
Creatine Matrix Blend	✓	No

The Proof is in the Pounds!

Get Your Muscle On:

A university study has proven that the ratio of macronutrients in Amplified Mass XXX™ can help you increase lean muscle mass and improve strength and stamina with 40% fewer sets.* That means you get the same results with three sets of resistance training as non-users get with five sets.*

Add More Performance:

Studies show that betaine supports athletic performance.*

Enhance Your Results:

Furthermore, over 500 research studies confirm that creatine can safely and effectively improve gains in muscle mass and athletic performance when combined with regular exercise.*

**AMPLIFIED
3 SETS + MASS XXX™ = 5 SETS
EQUAL GAIN IN MASS, MUSCLE STRENGTH AND ENDURANCE[◇]**

[◇] In an eight-week, randomized, double-blind, placebo-controlled study of healthy male volunteers, 18 subjects completed 3 sets of resistance training (RT) daily + the macronutrient blend in Amplified Mass XXX™, and 16 subjects performed 5 sets RT daily with no supplement. After eight weeks, subjects on the supplement showed equal gains in body weight, fat free mass (FFM), maximal muscle strength (MMS) and muscle endurance (ME) with only 3 sets RT per day compared to the control group who completed 5 sets RT per day.

What is Amplified Mass XXX™?

Need to pack on the pounds? AMPlify your gains with Amplified Mass XXX™ - our best mass gainer ever. Exclusive to GNC, this rock solid formula is engineered with ingredients proven to help you increase lean mass, weight, strength and stamina.** Muscle up your diet with Amplified Mass XXX™ - the ultimate lean mass builder.

THE FOUNDATION - Science-Based Nutrition:

Balanced Sports Nutrition + Training = Maximal Gains in Lean Mass and Performance

The science doesn't lie - without enough of the right carbs, quality proteins and healthy fats to complement your training - you won't achieve maximal gains. The foundation of Amplified Mass XXX™ provides a ratio of nutrients proven to accelerate increases in lean mass and exercise performance.◇ This champion blend weighs in at 750 calories, 50 grams of fast, medium and slow absorbing proteins and a 124 gram blend of important carbs - and the amounts are even higher when mixed with milk. That's science-based nutrition for Advanced Muscle Performance.

When Should I Take It?

For maximum results, Amplified Mass XXX™ should be taken daily. On training days, the product should be consumed immediately after exercise. On non-training days, the product should be taken first thing in the morning or between meals.

THE EXTRAS - Beyond the Basics:

Wait. There's more. This motherload of mass gainers is enhanced beyond basic nutrition. Infused with functional blends of ingredients and technologies - this formula offers an arsenal of advantages...

Tri-MG Infusion™ - This anabolic blend consists of clinically studied betaine (a.k.a. trimethylglycine) and HMB. This combination of ingredients creates an anti-catabolic effect for your muscles.*

Micronized Amino Acids - Using MicroSorb™ Amino Technology, the amino acids added to this formula are pulverized, or "micronized" from large molecules into smaller particles to facilitate faster absorption. Why is that important? Better absorption of amino acids means better muscle fuel. These key amino acids, including glutamine, arginine and leucine, all support muscle protein synthesis and other key processes crucial to gaining mass.*

Creatine Matrix Blend - For added muscle benefits, this matrix includes 3 forms of creatine, plus other ingredients your body uses to make creatine. Creatine helps to improve energy production during exercise and is important for muscle protein synthesis.*

*Typical Amounts of Key Amino Acids Per 4 Scoop Serving to Support Optimal Muscle Growth and Development.***

10g of BCAA	35g of Muscle Supporting Amino Acids
LEUCINE	GLUTAMIC ACID & GLUTAMINE
ISOLEUCINE	ASPARTIC ACID
VALINE	LYSINE
	THREONINE
	PROLINE
	ALANINE
	SERINE
	PHENYLALANINE
	TYROSINE
	CYSTINE
	TRYPTOPHAN
	HISTIDINE

4g of Creatine Building Blocks
ARGININE
METHIONINE
GLYCINE
