

## NEXT GENERATION 5:1:1 MUSCLEBUILDING BCAA FORMULA

The new, supercharged musclebuilding amino formula from MuscleTech® SX-7® is here. Introducing, Amino 4XL™ SX-7® Black Onyx™, the only BCAA product that delivers a powerful 5:1:1 BCAA ratio (which includes both PepForm® leucine and ActiveTR™ leucine) combined with the clinically studied musclebuilding power of PEAK ATP®. Amino 4XL™ SX-7® Black Onyx™ also contains several other popular ingredients, such as taurine, L-citrulline, glutamine and an electrolyte blend that features coconut water. With Amino 4XL™ SX-7® Black Onyx™, you get everything you want in a BCAA formula and more!▲

**1. L-leucine (as L-leucine, PepForm® leucine & ActiveTR™ leucine)** – L-leucine is the BCAA with the highest anabolic potential. It activates the mTOR enzyme, which amplifies protein synthesis. The three different forms of leucine provided by Amino 4XL™ SX-7® Black Onyx™ ensures that your body gets a steady supply to keep your body in a prime anabolic state. <sup>1</sup> In fact, a 4g dose of leucine delivered in 1 scoop of Amino 4XL™ SX-7® Black Onyx™ is shown in a clinical study to help subjects increase their 5-rep max strength by over 40%.▲

**2. PEAK ATP® (Adenosine 5'-triphosphate disodium)** – Hard-training subjects who supplemented with 400mg of PEAK ATP® in a 12-week study at a leading university increased strength more than the placebo group. Even better, these same subjects gained 8.8 lbs. of lean muscle versus the placebo group, which only gained 4.6 lbs. – that's 90% more lean muscle!▲

**3. BCAAs** – Amino 4XL™ SX-7® Black Onyx™ delivers a potent BCAA ratio of 5:1:1 to ensure you get a clinically validated 4g dose of L-leucine in each scoop.

**4. Taurine** – The 1g dose of taurine found in each scoop of Amino 4XL™ SX-7® Black Onyx™ has been shown to increase endurance performance.▲

**5. L-citrulline** – A precursor to L-arginine that provides a spike to plasma arginine levels.▲

**6. Electrolyte blend** – Amino 4XL™ SX-7® Black Onyx™ delivers coconut water along with an electrolyte blend that helps restore electrolyte levels that are depleted during exercise.▲

**7. Glutamine** – The most abundant conditionally essential free amino acid in your body. It helps support increased cell volume, glycogen replenishment and protein synthesis.▲

**NEW!**
