# PROBI® 30 BILLION

Cyclical digestive issues can alter your living routine to the point that what you do and where you go is carefully planned. Apprehension over what you eat and the associated intestinal distress may present concern and anxiety. Understanding the role of probiotics can make a real difference in how you think about them and how they can help you in 'normalizing' your routine. Probiotics delivered with the right strain, in the right place, in the right dosage can help populate your system with the positive beneficial micro-flora that can make a difference in reducing those random, unexpected – even occasional intestinal disruptions that can impact how you live...day to day.\*

# PROBI® 30 BILLION

Today's advances focus less on the quantity and number of different strains, and more on identified strains that deliver clinically supported results and true potency at expiration. Probi® 30 from Solgar® delivers a focused, high dosage, single strain, clinically studied probiotic that provides integrated bowel support to not only address the occasional gas and bloating associated with upsetting digestive issues, but to support your daily abdominal comfort.\* Supported by numerous human clinical studies and over 10 years of substantiated and documented scientific review, the active probiotic in Probi® 30 works specifically and effectively to help balance your digestive tract when taken every day.\* Feeling well becomes...that easy.

By nature, most probiotics work best in the intestinal tract and not in the harsh, acidic environment of the stomach.\* Probi® 30 delivers probiotics where they're needed and is formulated to survive stomach acid so they are delivered directly into the intestinal tract where positive and beneficial micro-flora populate and grow.\* This way, you benefit from an increase of the 'good for you' healthy bacteria we need in our digestive system.\* All that and more in one little capsule, once a day. Probi® 30 from Solgar® – 30 billion live cultures every day...GUARANTEED.
