Throat Coat® LEMON ECHINACEA

Some of our favorite organic licorice root is **sustainably wild collected** from **fields in Kazakhstan**, where 14 collectors harvest for nine months out of the year. Although licorice grows like a weed and its wild stands stretch as far as the eye can see, our collectors rotate which fields **they harvest to ensure sustainability** of this important resource. We are careful to use mature roots because they contain **higher amounts of important components**, which are also responsible for licorice's **characteristic sweetness**.

We've Got the Right Stuff

We raise the bar. The quality standard of the herbs we use is hard to pronounce, difficult to meet, and it's what makes us different, better. We're not ashamed to say it. **Pharmacopoeial: it's the only quality standard our herbalists can rely on when blending teas for your health and wellness.
