QUEST BEYOND CEREAL PROTEIN BAR

QUEST

IT'S NOT CEREAL,
IT'S BEYOND CEREAL!

Regular cereal is made from grains. **BEYOND** cereal is made from protein! The Quest "Beyond Cereal" Bar has all the sweet, comforting crunch of a junk food cereal bar, but with the incredible nutritional profile you know you can expect from Quest.

It's a bar for the kid in all of us who loves cereal, but dares to dream **BEYOND** the ordinary.

NOT LIKE OTHER SUGARS!

Allulose is a sweetener that offers all the taste and texture of sugar, but with 1/10th of the calories. For this 38g bar, the 8g of Allulose contributes just 3.2 Calories (instead of 32 Calories that would have come from the same amount of traditional sugar). FDA requires Allulose to be listed under "Sugars" in the Nutrition Facts panel. Read more at QuestNutrition.com/Allulose

Serving Suggestion

Allulose is a low calorie monosaccharide that contributes 0.4 calories per gram. The FDA requires all monosaccharides to be counted in the "sugars" section of the Nutrition Facts Panel even though Allulose isn't metabolized like other sugars. There are 8g of Allulose in this product which contributes less than 4 calories per bar. To learn more, visit www.QuestNutrition.com/Allulose
