Carlson Buffalo Liver provides the nutrients found in the livers of bison, including vitamins B-2 and B-12, iron, and copper. The buffalo are part of a private, range-fed herd that's raised naturally on pristine mountainous land without the use of antibiotics, steroids, or other drugs. Once the livers are extracted, they're immediately freeze dried to protect nutritional value. Each serving provides 3 grams of buffalo liver concentrate, which supports healthy blood production and maintenance.*
