†Daily Value not established.

Other Ingredients: Isolate Protein & Peptide Blend (Whey Protein Isolate, Whey Peptides, Whey Protein Isolate 97%), Whey Protein Concentrate, Natural and Artificial Flavors, Gum Blend (Cellulose, Xanthan, Carrageenan), Calcium Carbonate, Beet Juice (Color), Salt, **Enzyplex** (Papain, Amylase), Sucralose, Citric Acid, Malic Acid, Acesulfame-Potassium, Soy or Sunflower Lecithin. Contains milk and soy ingredients. Processed in a facility that also processes egg, wheat, tree nut, fish, shellfish and peanut ingredients.

▲These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

This product contains 3g of creatine per serving which is in addition to the 30g of protein per serving shown in the Supplement Facts. Creatine, in combination with whey protein, has been clinically shown in a published study in the *International Journal of Sport Nutrition and Exercise Metabolism* to be more effective for building muscle than just whey protein alone. There are no added amino acids contained within this formula that are counted towards the total amount of protein listed on the label.

- NO Banned Substances
- NO Fillers
- NO Hype
- NO Exceptions

Just the Most Powerful Formulas Available

The Most Powerful Protein Formula Ever Developed

NITRO-TECH® is a scientifically engineered whey isolate+ lean musclebuilder formula designed for all athletes who are looking for more muscle, more strength and better performance. NITRO-TECH® contains protein sourced primarily from whey protein isolate and whey peptides – two of the cleanest and purest protein sources available to athletes. Other whey protein supplements might have only a few grams of these highly bioavailable and easily digested proteins. NITRO-TECH® is also enhanced with the most studied form of creatine for even better gains in muscle and strength.▲

• 70% Better Than Regular Whey Protein for Gains in Lean Muscle

▲In a six-week, double-blind study involving 36 test subjects with at least three years of weight-training experience divided into three groups, subjects combining the core ingredients in NITRO-TECH® with a weight-training program gained 70% more lean muscle than subjects using regular whey protein (8.8 vs. 5.1 lbs.) and increased their bench press more than subjects using regular whey protein (34 vs. 14 lbs.). These same subjects even gained 4 times the lean muscle as subjects using a placebo (8.8 vs. 2.0 lbs.)▲. This formula provides 30g of protein from ultra-pure protein. Plus, it delivers a clinically proven dose of creatine.

• Build More Strength Than Regular Whey Protein

Each scoop of NITRO-TECH® contains a research-proven dose (3 grams) of creatine monohydrate. Combined in NITRO-TECH®, whey protein and creatine build more strength than regular whey protein. In one study, subjects using the whey/creatine combination in NITRO-TECH® increased their one-rep max bench press by 34 lbs., compared to only 14 lbs. for subjects using regular whey protein.▲

• Ultra-Clean Protein Formula

A single scoop of NITRO-TECH® contains 30 grams of protein, primarily from whey protein isolate and whey peptides, with only 4 grams of carbs and 2.5 grams of fat! Most protein powders deliver significantly less protein per scoop while some protein formulas are loaded with fat and carbs. The whey protein in NITRO-TECH® has been filtered using Multi-Phase Filtration Technology for less fat, lactose and impurities than cheaper protein sources.

• Best-In-Class Taste

Every flavor of NITRO-TECH® won in head-to-head third-party taste tests against leading competitors.

• Get More for Your Money

Unlike the competition, Performance Series products contain superior key ingredients in clinically dosed amounts that are fully disclosed so you know exactly what you are paying for.

70% BETTER THAN WHEY

Research conducted and published in a scientific journal shows that subjects using the core formula in NITRO-TECH® gained 8.8 lbs. of lean muscle in six weeks compared to subjects who used regular whey protein and gained 5.1 lbs.▲ These results are based on testing at St. Francis Xavier University.
