

Know Your Protein!

SELECT PROTEIN™

The Science-Based Protein

Pea Protein

When it comes to a functional vegan protein, pea protein has become one of the most popular sources. When top-quality sources are used, it has a **mild taste and texture**. It also has one of the closest amino acid profiles to dairy and egg proteins.

Rice Protein

Rice protein is the truest companion to pea protein. Where pea protein's amino acid profile is weakest, rice protein's profile is strongest. The combination of these two protein sources can achieve an amino acid profile nearly identical to dairy or egg protein.

Taste the Quality | Simple Ingredients

The first thing you will notice from Select Vegan Protein is the superior taste and texture over vegan proteins you have previously used. This comes from our high quality sources of pea and rice protein, giving Select an unrivaled taste and texture. Not all protein is created equally. When you taste Select you will turn the bottle to see how we have done it.

It's not magic, it is simply investing in **ultimate quality**.

Amino Acid Composition

Essential Amino Acids

Typical Amount per Serving: ~ 7 g

Isoleucine	Phenylalanine
Leucine	Threonine
Lysine	Tryptophan
Methionine	Valine

Conditional Amino Acids

Typical Amount per Serving: ~ 7 g

Arginine	Histidine
Cystine	Proline
