

Optimize Your Blood Sugar Levels Naturally

To optimize your blood sugar (glucose) levels, proper diet and exercise are the first steps. Another natural step is using Glucocil to promote normal blood sugar as well as healthy weight, healthy energy, and healthy heart, blood vessels, and circulation!

Support the 3 Essentials of Glucose Control

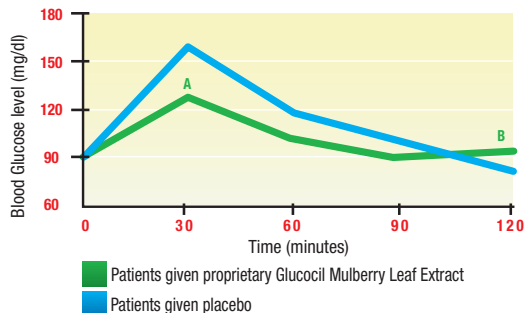

Glucocil is a clinically researched natural supplement created after 7 years of research and development. Glucocil supports the 3 essentials of your body's glucose management system, helping you maintain healthy fasting and post-meal blood sugar levels all day.

Glucose Control Essential #1: Reduce Absorption of Sugars and Other Carbohydrates

Ingesting sugar and other carbohydrates elevates your blood glucose levels, but the proprietary mulberry leaf extract in Glucocil gently and effectively reduces carbohydrate absorption. In a clinical study, it instantly lowered peak post-meal elevations by up to 44% and helped people maintain healthier blood sugar levels between meals.

Proprietary Glucocil Mulberry Leaf Extract Lowers Post-Meal Blood Sugar Spikes (A) and Keeps Blood Glucose Levels From Becoming Too Low (B)

Glucose Control Essential #2: Reduce Production of Glucose

Your liver makes glucose for energy, and a healthy amount of glucose production directly contributes to normal blood sugar levels. Glucocil ingredients help promote the normal production of glucose in the liver.

Glucose Control Essential #3: Increase Insulin Sensitivity

Insulin controls blood sugar levels by instructing cells to uptake glucose. When cells are sensitive to insulin, glucose uptake is normal, directly contributing to healthy blood sugar levels. Glucocil ingredients help activate cells' insulin receptors and support normal insulin sensitivity.

Promote Healthy Weight Loss

Because body weight has a major impact on your blood sugar levels, Glucocil is formulated to help with weight management, too. When fewer carbohydrates are absorbed, fewer calories are absorbed. And slower absorption of the remaining carbohydrates leads to a feeling of more fullness, which helps maintain a healthy diet plan.

Promote Healthy Insulin Production

Healthy insulin production is important for maintaining normal blood sugar levels. Clinical research demonstrates that a key ingredient in Glucocil helps promote and maintain healthy insulin production.

Promote Heart, Blood Vessel & Circulatory Health

Glucocil contains cardiovascular supportive ingredients that work hard to support your heart, blood vessels, and circulatory system.

Promote Healthy Energy

Glucocil reduces post-meal blood sugar spikes and extends sugar absorption from foods, helping sustain your energy. In addition, Glucocil ingredients support healthy energy metabolism.

Banaba Leaf Extract (18% Corosolic Acid)		+
Fish Oil	1200mg	+
Omega 3 Fatty Acids (EPA/DHA and other Omega 3)	350mg	+

* Percent Daily Values are based on a 2,000 calorie diet.
† Daily Value not established.

OTHER INGREDIENTS: Gelatin, Glycerin, Purified Water, Lecithin, Yellow Beeswax, Silicon Dioxide, Titanium Dioxide, Sodium Copper Chlorophyllin, Corn Oil.

Suggested Use: For the first 3 days, take 1 softgel with lunch and 1 softgel with dinner. After 3 days, take 2 softgels with lunch and 2 softgels with dinner. If you forget to take Glucocil with a meal, feel free to take it after that meal.

No Artificial Flavors or Preservatives

No Dairy, Egg, Gluten, Sodium, Starch, Stimulants, or Sugar

Contains fish and soy. The fish oil in Glucocil comes from deep ocean waters (anchovy, herring, salmon, and sprat) and is molecularly distilled for maximum purity, potency, and reduced fish odor.

Store in a cool, dry place, out of reach of children. Do not use if seal under cap is broken or missing

Caution: Talk with your doctor before using Glucocil. Not recommended for those who are under 18, pregnant, or nursing.
