

1-2 servings | 12-16 oz. | shake well

Suggested Use: Based on your performance needs, mix 1 to 2 scoops of SuperCarb into 12-16 oz. of water. Shake well for 30-45 seconds. Consume before, during, or after intense exercise as needed for added energy. Increase your dosage if engaging in prolonged exertion for 2 hours or more.

Use the following directions when mixing into larger containers such as a gallon jug or 5 gallon cooler:

1 GALLON
Mix 10 scoops of Super Carb into 1 gallon of water. Shake well for 30-45 seconds.

5 GALLON
Mix up to 50 scoops of Super Carb into 5 gallons of water. Stir thoroughly for 45-60 seconds.

SUPER CARB is the only high branched cyclic dextrin product on the market made by a company with over 20 years of experience in delivering high quality supplements. It represents a true breakthrough in carbohydrate technology for athletes. Highly branched cyclic dextrin is clinically validated to increase performance to unheard of levels while limiting any semblance of gastrointestinal distress. It achieves this by having a high molecular weight and an ultra-low osmolarity. Osmolarity is an indicator of how fast a liquid will move through the stomach and no carbohydrate on the market is faster than NutraBio SUPER CARB, including some other cyclic dextrin products. Even better, this product is perfect for athletes and weightlifters of all backgrounds and ages because it's free of all banned substances. NutraBio is known for being 100% transparent for its customers and has been for well over a decade. You TRAIN WITHOUT COMPROMISE, and we've put every ounce of effort into designing SUPER CARB WITHOUT COMPROMISE. †
