

How to use:

Use after cleansing and before applying moisturizer, or throughout the day as a refresh. Spray one or two times onto a cotton ball and gently pad over face, or mist directly onto face.

Why rosewater?

Organic rose hydrosol is made from steam distilling rose petals. Our rosewater gently softens and soothes skin, while also reducing dryness. Toning is particularly useful in balancing pH levels post-cleansing.

Ingredients:

Organic Rosa Centifolia Flower Water (**Rose Water**)

Proudly California Made
