

DUAL-CAPSULE, PILL-WITHIN-A-PILL TECHNOLOGY

Introducing the world's most advanced new dual-capsule technology that harnesses the power of a super-concentrated, micronized powder capsule suspended within a highly bioavailable liquid capsule. The rapid-release liquid is isolated from the micronized powder, separating the ingredients in their most stable inherent states until the moment of absorption! This advanced technology overcomes the limitations of outdated liquid and powder pills by synergizing two capsules in one. It's technology meeting efficacy without compromise.

TECHNOLOGY MEETS EFFICACY WITHOUT COMPROMISE

ADVANCED DUAL-CAPSULE TECHNOLOGY

This breakthrough, patented process physically isolates distinct active ingredients into two separate capsules. The inner pill harnesses a high-quality combination of non-stimulant ingredients - it's the perfect addition to your supplement stack! It's suspended in a bioavailable liquid matrix featuring a concentrated source of CLA. This cutting-edge technology allows for both fast-release liquid and rapid-dispersion powder co-release when you need it most!

FAST-RELEASE LIQUID PILL

Featuring a concentrated source of CLA, derived from 100% pure safflower oil, so you can trust that you're getting truly ultra-pure CLA with all of the key isomers.

+

MICRONIZED GARCINIA PLUS MATRIX

To ensure this formula is truly unique, SX-7[®] Revolution researchers also included doses of L-carnitine L-tartrate and two types of garcinia (Garcinia cambogia and Garcinia atroviridis).
