Magnesium is the fourth most abundant mineral in the human body. It is responsible for over 300 biochemical responses in the human body and fuels digestive enzymes, helping the body effectively utilize carbohydrates, proteins, and fats.‡ Magnesium plays a key role in energy metabolism, nerve conduction, muscle contraction, immune function, bone and tooth formation, and is particularly important to heart and circulatory health.† Research has shown many American diets to be deficient in magnesium.‡

Magnesium Tablets is a carefully formulated blend of complementary sources of magnesium that provides 300 mg of magnesium per serving to help you maintain healthy levels of magnesium in the body for optimum health and wellness.

Suggested Use: Take 2 tablets daily at mealtime for best results.

ConcenTrace® is a trade name for concentrated sea minerals from the Great Salt Lake.
