## Calorie Content (Calculated):

The calorie content (ME) is 900 kcal/kg or 13.5 kcal/Tbs when reconstituted 1:2.

**Ingredients:** Vegetable Oil (Preserved with Tocopherols), Casein, Dried Milk Protein, Dried Skimmed Milk, L-Arginine, DL-Methionine, Lecithin, Dicalcium Phosphate, Choline Chloride, Calcium Carbonate, Maltodextrins, Monopotassium Phosphate, Salt, Taurine, Potassium Chloride, Vitamin E Supplement, Vitamin A Supplement, Iron Protein, Magnesium Sulfate, Vitamin D-3 Supplement, Copper Protein, Calcium Pantothenate, Manganese Sulfate, Zinc Sulfate, Niacin Supplement, Riboflavin Supplement, Thiamine Mononitrate, Calcium Iodate, Pyridoxine Hydrochloride, Folic Acid, Vitamin B-12 Supplement.

## Storage:

Unopened powder should be stored in a cool, dry place. Reconstituted milk replacer must be kept refrigerated for up to 24 hours. Opened powder must be refrigerated for up to 3 months or can be frozen for up to 6 months to preserve freshness.

**Not for human consumption. Sold by weight not by volume.**  
**This product is intended for intermittent or supplemental feeding only.**

## GNC PETS QUALITY COMMITMENT

Since 1935, GNC has been the leader in the development and manufacture of human nutritional supplements. GNC's commitment carries over to Pet Products! GNC Pet Products are produced at the same highest quality standards as our human supplements.

ULTRA MEGA

# PREMIUM MILK REPLACER

ENRICHED FORMULA POWDER

FROM SKIM MILK

Wholesome nourishment with essential nutrients for puppies

**STRONG**  
Bone Development

**SUPPORTS**  
Healthy Teeth

**IMMUNE**  
Support

Made with natural milk proteins

**PUPPIES** NET WT. 28 OZ (794 G)

Prepared liquid milk replacer should be refrigerated. One 28 oz can of powder makes approximately 140 oz of liquid when mixed 1:2.

## Feeding Directions:

**Newborn Puppies:** Mix powder with water (see Mixing Directions below). Warm liquid to at least room temperature, but no warmer than 100° F (37° C). Test liquid on your wrist prior to feeding to be sure that temperature is not too hot.

Healthy puppies grow rapidly and their nutritional needs change as they grow. To ensure adequate feeding, weigh your puppy 3 times per week. **Depending on your puppy's weight, you will need to increase or decrease the amount of milk replacer in order to meet your puppy's individual nutritional needs.** Calculate your puppy's total nutritional needs per day (see Daily Feeding Amount below). Mix enough milk replacer for an entire day and feed equal amounts of milk replacer every 8 hours. Small and/or weak puppies should be fed equal amounts of milk replacer every 3 to 4 hours. If your puppy is old enough to lap, milk replacer can be given in a shallow container.

**Daily Feeding Amount: Feed your puppy 2 tablespoons (30 ml) of liquid milk replacer for every 4 ounces (115 g) of body weight per day.** For example, a 1 lb (16 oz) puppy should be fed 8 tablespoons (120 ml) of liquid milk replacer per day. If feeding the puppy every 8 hours, give 40 ml (approximately 2½ tablespoons) of liquid at each feeding; if feeding the puppy every 3-4 hours, give 15 - 20 ml (approximately 1¼ tablespoons) of liquid at each feeding.

**Growing Puppies (post weaning), Show Dogs and/or Convalescing Dogs:** Feed 1 teaspoon (2 g) of the milk replacer powder per 5 lbs (2.2 kg) of body weight per day by top dressing food.

**Pregnant and Lactating Bitches:** Feed 2 teaspoons (4 g) of the milk replacer powder per 5 lbs (2.2 kg) of body weight per day by top dressing food.

## Mixing Directions:

Add milk replacer powder to warm water in a 1:2 ratio as described below (for example, add 1 tablespoon of powder to 2 tablespoons of water). Stir gently until mixed well. Do not use a blender to mix.

Weight of Puppy	Amount of Powder Milk Replacer per day	Amount of Water to be added
3 ounces (85 g)	1 tablespoon (15 g)	2 tablespoons (30 ml)
6 ounces (170 g)	2 tablespoons (30 g)	4 tablespoons (60 ml)
12 ounces (340 g)	4 tablespoons (60 g)	8 tablespoons (120 ml)
16 ounces (453.5 g, 1 lb)	5 tablespoons (75 g)	10 tablespoons (150 ml)

Consult your veterinarian for additional advice.
