PROBI® 20 BILLION

Understanding probiotics can make a real difference in "how you think" about them. Today's advances focus *less* on the quantity and number of different strains and *more* on identified strains that deliver clinically supported results, true potency even at expiration, and strains robust enough to survive even harsh stomach acid. That's the difference you'll find with Probi® 20 from Solgar®. It delivers all this...and much more.

By nature, most probiotics work best in the intestinal tract and not in the harsh, acidic environment of the stomach. Probi® 20 from Solgar® is formulated to survive stomach acid so it's delivered directly into the intestinal tract to help populate your system with a positive balance of beneficial micro-flora.*

DIETARY SUPPLEMENT

PROBI® 20 BILLION

At birth, we come into the world bacteria free. In the first few days of life we are exposed to all kinds of bacteria – some of which form a symbiotic relationship with our body through time. Our bodies are then naturally populated with the beneficial and indigenous bacteria that are necessary for long-term health and wellness. Repopulating over time with these indigenous strains nurtures and perpetuates the natural ecological foundation that nature gave us.* Probi® 20 generates that repopulation with one of the original indigenous strains.*

Studied, substantiated and documented by gastroenterologists, Probi® 20 is formulated with live, active, naturally occurring cultures to remain potent and effective. On a daily basis, Probi® 20 not only naturally supports and maintains ongoing digestive health, but also helps with occasional gas and bloating while supporting abdominal comfort.* All this in one little capsule, once a day. Probi® 20 from Solgar® – 20 billion live cultures every day...GUARANTEED.
