

30% Increase in Muscle Strength[□]

WHEY PROTEIN + LEUCINE GROUP

CARB PLACEBO GROUP

[□]An 8-week study of athletes performing an intense resistance exercise training regimen demonstrated that those using this proprietary module of whey protein and leucine had greater increases in muscle strength and size than those on a placebo.

Increases Muscle Strength and Stamina with Half the Sets[◇]

In a clinical study using a reduced volume resistance training protocol, the anabolic module in Amplified Wheyboldic Extreme 60™ Original has been clinically shown to provide the same gains in maximum muscle strength and stamina doing one set while using Amplified Wheyboldic Extreme 60™ Original when compared to two sets of the same amount of training without supplementation.*[◇]

*When used in conjunction with an exercise program. As with any food product, use of this product alone will not lead to increased muscle mass or strength.

[◇]Inclusion of these enzymes resulted in a 12% greater protein breakdown as measured by the release profile of the amino acid tyrosine. These results represent the enzyme activity potential under simulated conditions. Effects in the human body have not been studied.

[◇]Per 3 scoop serving.

1 SET + AMPLIFIED WHEYBOLIC EXTREME 60™ ORIGINAL = 2 SETS![◇]

SUPPLEMENT + 1 SET

[◇]In an eight-week, randomized, double-blind, placebo-controlled study of 30 healthy male volunteers comparing 1 set resistance training (RT) + active or carbohydrate placebo to 2 sets RT alone with no supplement, the active group showed equal gains in maximal muscle strength (1RM) and muscle endurance (ME) compared to the control group.

What is Amplified Wheyboldic Extreme 60™ Original?

Looking for a protein that will help AMPLify your game? When it comes to enhancing your strength, size and stamina, nothing complements your training regimen like Amplified Wheyboldic Extreme 60™ Original! It is GNC's top protein formula with a base of whey and leucine – proven in clinical studies to give you a 30% increase in strength, increased muscle size, and a 100% improvement in exercise efficiency.[◇][□]* That's better fuel for a stronger body – premium protein for ADVANCED MUSCLE PERFORMANCE.^{**}

The Amplified Wheyboldic Extreme 60™ Original Evolution

How is this protein AMPLified? GNC's scientists worked with leading exercise and sports nutrition experts and went beyond the extreme to develop this distinct product...

Highly Effective Whey-Leucine Base

The impressive 60 grams of protein[†] are made entirely from two of the highest-quality, fast-absorbing forms of whey protein – isolates and hydrolysates. With 7.7 grams of leucine, this creates an ideal environment for muscle protein synthesis.[‡] This potent blend upregulates multiple Genetic Signaling Pathways (GSP) to enhance anabolism and muscle performance.^{**} In fact, the whey and leucine blend in Amplified Wheyboldic Extreme 60™ Original has been shown to increase muscle strength and stamina with half the sets.[◇][□]*

Micronized Amino Acids

Using MicroSorb™ Amino Technology, the amino acids added to this formula are pulverized, or micronized, from large molecules into smaller particles to facilitate faster absorption. Why is that important? Better absorption of amino acids means better muscle fuel. These key amino acids support muscle building and recovery.^{**}

More Key Aminos

In addition to a whopping 7.7 grams of leucine, this formula is loaded with an array of aminos necessary for your muscles.[‡] This complex blend of amino acids delivers 3.4 grams of arginine, which is involved in creatine synthesis, and 9.6 grams of glutamic acid & glutamine supporting anabolic effects.[‡] The amino acid L-carnitine is included to help transform fatty acids into energy for muscles and the body's energy production system.^{*}

Amino Acceleration System

Wheyboldic Extreme 60™ Original features an Amino Acceleration System - a digestive enzyme blend with proven bioactivity. This proprietary enzyme blend provides a 12% greater protein breakdown for improved amino acid uptake.[◇]*
