Allulose is a "rare" sugar that is very different than "regular" sugar. It tastes like sugar but up to 100% of it passes through the body without being metabolized. It has almost zero calories (less than 0.4 calories/gram) and doesn't affect your body like "regular" sugar. Allulose is found in nature in many fruits and it's what makes Quest Beyond Cereal Bars taste great without the extra net carbs and calories.
