

GLUTEN FREE • NON - GMO

THE LILY DIFFERENCE

We harvest aloe from our own certified organic fields.

We safely process the aloe plants in our own facilities.

We bottle the aloe in-house to maintain quality control.

This allows us to meet the highest quality standards while keeping costs lower for you. Our goal is to 'retain the quality that nature created' with each step of our process. But we also take our product quality even further with:

Aloesorb: Science has shown that naturally-occurring polysaccharides are the driving force behind aloe's benefits. Aloesorb is a concentration of high quality aloe polysaccharides that we extract from our aloe through a proprietary process and has been clinically proven to assist with*:

- improving nutrient absorption
- balancing digestion and stomach pH
- supporting a healthy immune system
- enhancing antioxidant support
- reducing toxic levels of nitrates
- normal muscle and joint function

GRAS Certification: Our products are certified Generally Recognized As Safe by an expert research panel**, giving you confidence that you can use our products daily.

OUR PRODUCTS ARE:

- aloe free (less than 1 ppm)
- naturally gluten free
- allergen free (allergen free facility)
- gmo free
- BPA free
- vegan

This is a natural product; therefore, the color may change due to seasonality without affecting its quality.
