

USAGE: Take 1 tablespoon per day on an empty stomach or as directed by your qualified healthcare professional. Store in a cool, dry place.

NOTE: If you have a medical condition, are pregnant, lactating, trying to conceive, under the age of 18, or taking medications, consult your healthcare professional before using this product.

L-Carnitine is essential for the production of energy from fatty acids by virtue of its role in the transport of fatty acids into the mitochondria for energy production (in a process called beta oxidation).* L-Carnitine enhances the rate of ATP production (also called oxidative phosphorylation), which is a key step in energy production throughout the body.*

By enhancing fatty acid metabolism via beta oxidation, carnitine can support healthy triglyceride levels.* Major body tissues, particularly the heart and skeletal muscles, depend on fatty acid oxidation as their primary source of energy. L-Carnitine promotes efficient heart function.* L-Carnitine is also involved in sperm motility.*

Vitamin B₅ is also involved in the transport of fatty acids into the mitochondria.*

Biosint™ L-Carnitine is manufactured by Sigma-tau Industries, S.p.A. (Rome, Italy), the pioneer in L-Carnitine science.

Liquid Carnitine is in a **CarniSorb®** format, providing rapid absorption.

Keep out of the reach of children.
