**Yaeyama Chlorella** is a single-celled, fresh water algae, grown in the environmentally pristine coral reef region of Japan's Ishigaki Island. Yaeyama Chlorella cell walls are broken by a high-impact, jet-spray drying process.

Yaeyama Chlorella provides chlorophyll, RNA, DNA, and proteins, and is a source of naturally occurring vitamins and minerals. Yaeyama Chlorella supports healthy cell function and promotes detoxification, especially heavy metal excretion.\* "Yaeyama" means richer, more flavorful and more nutritious chlorella!

**Keep out of the reach of children.**
