

Let's face it, I contain many incredible ingredients but here are a few of my best.

Thank Goat you found me.

The PH of Goats Milk is very close to that of human skin & has been traditionally used as a natural remedy for restoring skin health.

We goat your back.

All our products are free from parabens, nasty chemicals & toxins. Milked with love – our goats are our friends.

NATURAL
CLAY MASK

THANK
GOAT.™

hydrate.

noun

Goats milk based face mask for dry skin to smooth + hydrate your complexion.

#thankgoat

WITH HYDRATING JOJOBA OIL, COCONUT OIL + SEA MINERALS

NO SLS, SLES, EDTA, PARABENS

My perfect match.

I like: Tired skin (few sleepless nights?)
// Dry flakey skin // Skin exposed to harsh climates (long days in the sun or snow?) // Someone to have an Espresso Martini, or two, with.

The perfect facial (Directions):

STEP 1 (Game Face): Apply your clay by gently squeezing out enough mask to evenly cover your face avoiding the eye area. If contact with the eyes occurs flush with water. Now the hard work's done let the fun (and magic) begin.

STEP 2 (Inner wild child): Kick back, turn music on, do a cartwheel or whatever floats your goat. Gently wash your mask off after 8 minutes or until nearly dry with warm water and a face cloth.

STEP 3 (Bye now): By now you've hopefully mastered that cartwheel, danced your heart out and have definitely improved your complexion. See you at the bar.

Ingredients: Water (Aqua), Kaolin, Glycerin, Tapioca Starch, Camellia Sinensis Leaf Powder, Citric Acid, Potassium Cetyl Phosphate, Sodium Citrate, Simmondsia Chinensis (Jojoba) Seed Oil, Cocos Nucifera (Coconut) Oil, Aloe Barbadensis Leaf Juice, Illite, Montmorillonite, Avena Sativa (Oat) Bran Extract, Goat Milk (Caprae Lac), Silt, Zeolite, Xanthan Gum, Carrageenan, Mentha Arvensis Leaf Oil, Salicylic Acid, Benzyl Alcohol, Dehydroacetic Acid. **ALLERGENS: Benzyl Alcohol (Preservative constituent)**

WARNING: Not edible. Patch test on small area. If irritation occurs discontinue use immediately.

LOOK AFTER ME: Keep out of direct light or other sources of strong light. Product to be stored between 5-25 °C (41-82°F).
