Digestive discomfort, especially nausea, is common in the first trimester of pregnancy. The second and third trimesters often bring additional gastrointestinal disturbances like occasional gas and bloating.

Digest™ Pregnancy is a pure and gentle formula with a unique combination of enzymes to help pregnant women cope with digestive discomforts.* The included amount of the enzyme Phytase has been shown to enhance the body's utilization of essential minerals.* The addition of organic ginger root aids in reducing nausea common to pregnancy.*

Recommended Use: 1 capsule with each meal. More may be taken as needed.

Thera-blend™ is an exclusive process that combines multiple strains of enzymes that work in various pH levels. Thera-blend enzymes have been shown to work three times stronger and more than six times faster than leading digestive supplements. For more information, visit www.enzymedica.com.
