

ULTIMATE TESTOSTERONE MALE VITALITY FORMULA

You are now holding the most advanced 10-hour testosterone male vitality formula ever. This product was engineered for active males using clinically studied core ingredients in a unique, never-before-seen combination. The key ingredients in **VITALIGENIX T10™** are backed by multiple scientific studies — most testosterone boosters on the market today are not backed by a single study. This all-out, multifaceted formula also includes a core ingredient shown to boost free testosterone levels and decrease estradiol in test subjects. This one-of-a-kind formula for active men works to quickly raise your testosterone levels for real same-day results.▲

ELEVATE FREE (ACTIVE) TESTOSTERONE AND DECREASE ESTRADIOL

VITALIGENIX T10™ also uses a clinical dose of boron, which has been shown in human clinical research to increase free testosterone within the normal range and decrease estrogenic effects in just seven days. Free testosterone is not bound to protein or albumin, rather it circulates in the bloodstream and can be utilized by the body for required functions. What's more, testosterone is a critical component of muscle, strength and vitality in men.▲

BOOST BIOLOGICALLY ACTIVE TESTOSTERONE

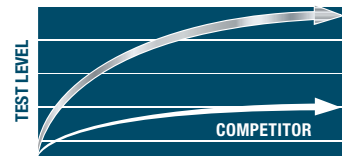

Your body has three types of testosterone. However, only testosterone bound to albumin (albumin-T) and free testosterone (free-T) are biologically active, which means your body can use them for multiple physiological functions. These are the critical pathways that the key ingredient in **VITALIGENIX T10™** acts on.▲

RESULTS IN 10 HOURS!

VITALIGENIX T10™ is designed for active men and delivers a scientifically validated increase in bioavailable testosterone levels in 10 hours. Most testosterone boosters take days, weeks or even months to increase testosterone. **VITALIGENIX T10™** takes just hours!

¹In fact, in a randomized, double-blind, placebo-controlled study on healthy male subjects, supplementation with a key ingredient in **VITALIGENIX T10™** resulted in a 33.8% increase in bioavailable testosterone in just 10 hours — real same-day results! Why is this important? An increase in bioavailable testosterone allows for a higher volume of biologically active testosterone to interact with androgen receptors through the natural biological process to produce a physiological response.▲
