

Natural Vitamin E is an essential nutrient and is the body's primary fat-soluble antioxidant. Vitamin E provides nutritional support for the immune system. Vitamin E is essential for many cells, including heart muscle cells. It helps fight cell-damaging free radicals that cause oxidative stress in the body, which may contribute to the premature aging of cells. This formulation provides natural Vitamin E as d-Alpha Tocopherol, and mixed tocopherols including d-Gamma, d-Delta and d-Beta Tocopherols. It is offered in oil-based softgels to promote optimal absorption and assimilation.*
