

healthy bones\*

**Collagen** is a complex structural protein that maintains strength and flexibility throughout the body. As we age, collagen depletion can lead to common signs of aging in the skin, hair, nails, muscles, tendons, ligaments and bones.

Clinical studies have shown that taking collagen can promote healthy collagen formation throughout the body.\* Super Collagen™ uses an advanced hydrolyzation process to convert large collagen molecules into small peptides that are bioactive in the body.\*

**SUGGESTED USE:** Take one (1) scoop (about 6.6 grams) daily, dissolved into a glass of water, coffee or orange juice. May be taken on an empty stomach.
