Code 77588 V7

This product is naturally hard and color/texture will vary depending on temperature. This product will melt when warmed above body temperature and become solid again when cool. This is natural and may affect the appearance, but will not harm the quality of the product. This warming and cooling may produce fat crystals affecting the color/texture making it appear grainy or uneven. If hard, shea butter can be softened by placing in a pan of hot water (e.g. 100 F or warmer) for 30 minutes or microwaved until soft.

Caution for Microwaving: This jar contains a foil seal. Do not place this jar directly in microwave. Before microwaving, scoop out desired amount and place in a microwave-safe container. Allow time to cool before applying.

shea butter

100% natural
emollient / seals in moisture

Net 7 fl. oz. (207 mL)

Condition: Dry, cracked or chapped skin in need of moisture, especially on tougher areas such as the elbows, knees and feet.

Solution: 100% Natural Shea Butter has a rich, luxurious texture that penetrates deep to condition and moisturize every type of skin. Shea Butter is derived from the tree nuts of the karite trees that grow in Western and Central Africa. It is a wonderful emollient that's perfect for daily use. Can also be used as a scalp moisturizer.

Suggested Use: Gently apply as desired, paying close attention to dry or chapped areas, reapply as needed.

**This product is guaranteed to be 100% natural.
Hexane-Free.**
