WOMEN'S

Multivitamin

PRENATAL

PLUS IRON

Support for mom and baby before, during and after pregnancy. This formula features a balanced nutritional blend of vitamins, minerals and antioxidants.

✔ Fetal Development

Provides 1000 mcg of folic acid, which, as part of a healthy diet, may reduce the risk of brain and spinal cord birth defects when taken before and during pregnancy. It's also required for cell growth and DNA formation.*

✔ Bone Health

Features 600 mg of calcium, which is especially vital during the third trimester when your baby's bones begin to calcify. If a mother's calcium level drops, her body can pull calcium from her bones, which can result in loss of bone density.*

✔ Iron

Contains 18 mg of iron. Iron plays a crucial role in the formation of healthy red blood cells, which are essential to support placental and fetal needs and a mother's increased blood volume.*

✔ Antioxidants

Has antioxidants for protection from harmful free radicals.*
