

PEPTIDES WITH METABOLIC ACTIVATION*

Peptide 320 delivers metabolic support by targeting the body's thermogenic systems. It features TheoLim®, a patented thermogenic activator. TheoLim® supports the natural release of GLP-1, while also boosting adiponectin to activate AMPK—igniting your metabolic switch and helping your body burn 3.2x the calories at rest.* It also includes DNF-10™, a specialized peptide from hydrolyzed brewer's yeast.
