\*A randomized clinical study of 140 healthy overweight people compared the use of Slimvance® in conjunction with an 1,800-calorie diet and walking plan to a placebo with the same diet and walking plan. Those on Slimvance® lost 1 more pound (-1.46 pounds versus -0.42 pounds) than the placebo group after 2 weeks and lost almost 10 more pounds (-11.81 pounds vs. -1.91 pounds), over an inch more around the hips (-1.76 inches vs. -0.48 inches) and over an inch more around the waist (-2.12 inches vs. -0.88 inches) than the placebo group after 16 weeks. Those on Slimvance® also had improved BMI (-0.63 kg/m2 versus -0.10 kg/m2) than the placebo group after 4 weeks. Use in conjunction with the Slimvance® diet and exercise program.

\*\*In a randomized, double-blind, placebo-controlled study, 70 men and women took a placebo or AlperFIT™ and followed their routine diet and exercise regimen for 12 weeks. Results from an ITT analysis of covariance showed that the increase above pre-treatment in those taking AlperFIT™ burned an additional 171 more calories per day (225.5 calories per day vs. 54.32 calories per day) than the placebo group after 12 weeks.
