

Vitamin C is a key building block in the body. Vitamin C is required for many biological processes, but it is best known for its important role in supporting immune system health.[†] Vitamin C helps support healthy blood cells to support immune health and also acts as an antioxidant to help cells fight against oxidative stress.[†] Because this important vitamin isn't produced or stored by the body, it is important to replenish Vitamin C daily.[†] **Nature's Lab Vitamin C** is a convenient way to help achieve healthy levels of Vitamin C.[†]

Nature's Lab Vitamin C:

- Supports Immune System Health[†]
- Supports Antioxidant Health[†]
- Contains 1,000 mg Vitamin C Per Serving

Warnings: Pregnant or lactating women and people with known medical conditions and/or taking drugs should consult with a qualified healthcare practitioner prior to taking dietary supplements.
