

Iron is an essential trace mineral and an important component of hemoglobin, the protein in red blood cells that assists in the transportation of oxygen throughout the body. Low iron levels may lead to feelings of fatigue.[†]

Nature's Lab Iron Plus Vitamin C supports iron regulation to promote healthy energy levels and red blood cell health.[†] This formula utilizes carbonyl iron, a gradual and gentle iron that's easy to digest, as well as vitamin C for enhanced absorption.[†]

Warnings: Pregnant or lactating women and people with known medical conditions and/or taking drugs should consult with a qualified healthcare practitioner prior to taking dietary supplements. Discontinue use and consult your doctor if any adverse reactions occur.
