DETAILED MIX & USAGE INSTRUCTIONS

SHAKER BOTTLE PREPARATION INSTRUCTIONS

Add your desired amount of protein to a shaker with 6-8 ounces of water or milk per Loaded Protein™ serving and shake vigorously. Adjust your water usage to achieve your preferred sweetness level. If possible, always add Loaded Protein™ into a shaker already filled with water to ensure complete solubility.

GLASS AND SPOON PREPARATION INSTRUCTIONS

Loaded Protein™ is completely instantized, so you can easily mix a protein shake with as little as a glass and spoon if you're in a pinch. Add your desired amount of protein to a glass with 6-8 ounces of water or milk per Loaded Protein™ serving and stir gently with a spoon. If you prefer your shake to be on the sweeter side, slightly reduce the amount of water used per Loaded Protein™ serving. Conversely, if you'd like a less bold taste, consider adding more water at your next usage.

BLENDER PREPARATION INSTRUCTIONS

Add water and/or milk, a handful of ice cubes, your desired ingredients and your preferred servings of Loaded Protein™ into the blender. After closing the lid, blend for 20-30 seconds or until you reach your target consistency.

ALLERGENS: Milk, Soy
