

Nervous System Support Formula*
 Zahler Inositol + Glycine is a combination of two foundational substances for healthy neurologic function, supporting critical roles in neurotransmitter messaging systems. In addition, Inositol and Glycine participate in the metabolism of fat in the liver as well as help promote glycogen storage, thereby making glucose readily available for energy metabolism.*

You may need additional supplements to support a healthy diet; consult your nutritionist for a formula that is right for you or contact us at 877-ASK-ZAHLER (877-275-9245) or ask@zahlers.com.
