\*\* The % Daily Value (DV) tells you how much a nutrient in a serving of food contributes to a daily diet. 2,000 calories a day is used for general nutrition advice.

† Daily Value (DV) not established.

**Warning:** Unsuitable for infants under 1 year old.

### Who We Are?

Woman Entrepreneur and Food Scientist Dr. Asli Samanci needed to find a solution to her son's weakened immune system. A Pediatrician recommended that she try giving her son propolis. She started production of propolis for the first time for his son and subsequently developed a patented propolis extraction method. Based on this experience, she founded BEE&YOU to help those who want to support their immune system naturally.

### What is Anatolian Bee Propolis?

Propolis is a natural bee product that honeybees collect from the leaves, buds and stems of the plants. Honeybees use propolis to protect their hives from fungus, bacteria and viruses. It acts as a natural protective barrier. We source our propolis from pristine Anatolian mountains which is home to 12,000 different plant species and one of the most biodiverse regions in the world.

### How Do We Produce Our Products?

Our products are produced by "Contracted Beekeeping" to assure the highest quality and traceability from our hives to your table. Our products are also tested for purity, antioxidant activity and compliance with food safety standards.
