COLLAGEN SHOT

FROM THE FASCINATING ANATOLIA

BEE & YOU

COLLAGEN TYPES I & III 6500 mg
HYALURONIC ACID 40 mg
BIOITIN 45mcg
VITAMIN C 105 mg
PROPOLIS 500 mg

PROPOLIS is a natural bee product that honeybees collect from the leaves, buds and stems of the plants. Honeybees use propolis to protect their beehives from fungus, bacteria and viruses. It acts as a natural protective barrier. We source our propolis from pristine Anatolian mountains which is home to 12,000 different plant species and one of the most biodiverse regions in the world.*

Collagen is the most abundant protein in the human body, especially in skin, muscles, and bones. Type I collagen is the most abundant protein of skin, bones, tendons, and ligaments. Type II collagen is the second most abundant protein of intestines, muscles, and blood vessels. Natural collagen production begins to decline as we grow older.*

Who We Are?
Woman Entrepreneur and Food Scientist Dr. Asi Samanci needed to find a solution to her son's weakened immune system. A Pediatrician recommended that she try give her son propolis. She started production of propolis for the first time for his son and subsequently developed a patented propolis extraction method. Based on this experience, she founded BEE&YOU to help those who want to support their immune system naturally.
