

Joint Mobility Blend*

Supplement Facts

Serving Size One Yellow Capsule

Amount Per Serving	
TamaFlex®	250 mg *
Tamarind (<i>Tamarindus indica</i>) Seed Extract	
Turmeric (<i>Curcuma longa</i>) Rhizome Extract	

* Daily Value not established.

OTHER INGREDIENTS: Microcrystalline Cellulose, Hydroxypropyl Methylcellulose, Dicalcium Phosphate and Less than 2%: Calcium Silicate, Gellan Gum, Magnesium Stearate Vegetable Source, Silicon Dioxide.

ACTUAL SIZE

Liver & Cell Support*

Supplement Facts

Serving Size One Black Capsule

Amount Per Serving	
N-Acetyl-L-Cysteine (NAC)	600 mg *

* Daily Value not established.

OTHER INGREDIENTS: Microcrystalline Cellulose, Gelatin, Stearic Acid and Less than 2%: FD&C Blue #1, FD&C Red #40.

ACTUAL SIZE

^ In a randomized, double-blind, placebo-controlled study of 111 healthy participants, those taking the GNC vitamin and mineral blend for six weeks had statistically significant increases in serum levels of a group of B vitamins and a group of antioxidants and carotenoids on a multivariate statistical analysis when compared to those taking placebo or a basic multivitamin. Statistical improvements in SF-36 Vitality and Mental Health scores were also observed compared to placebo.

* An 8-week randomized, double-blind, placebo-controlled study of 118 healthy men participating in a supervised resistance training program showed that those taking MyoTOR® had significant increases in mean upper body strength (42.5 lb. vs. 19.4 lb.), mean lower body strength (37.1 lb. vs. 19.2 lb.) and muscle endurance after 8 weeks vs. those who took a placebo with the same exercise. Improvements in strength were seen in as early as 2 weeks. Men on MyoTOR® had greater improvements in muscle strength and upper body endurance vs. those who took a placebo but exercised twice as much.

* In a randomized, double-blind, placebo-controlled study, 90 subjects took TamaFlex® (250 mg/d), another herbal blend or placebo for 8 weeks. TamaFlex® resulted in statistically significant improvements in (i) WOMAC (total: joint comfort, stiffness & physical function), (ii) VAS-pain, (iii) 6-minute walk test (6MWT), (iv) stair climb test (SCT), (v) Lequesne Functional Index (LFI), (vi) knee flexion. Improvements were seen in as early as 5 days.
