

Nature's Lab Triple Strength Fish Oil contains a highly concentrated serving of healthy Omega-3 fatty acids, including highly unsaturated EPA and DHA. These essential fatty acids play an important role within the body, including cardiovascular support as well as brain and vision health.[†] Omega-3s support heart health by helping maintain triglyceride levels already within a normal range and by promoting healthy blood flow.[†]

This formula utilizes fish oil sourced from small wild caught, sustainable fish purified by molecular distillation to remove dioxin, PCBs and mercury.

[†]These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

Warnings: Pregnant or lactating women and people with known medical conditions and/or taking drugs should consult with a qualified healthcare practitioner prior to taking dietary supplements.
